Gold American Eagle Proof 70 Coins

SECURE YOUR LEGACY

America’s #1 Coin Investment
(1986 - 2020)

Featuring the
Ed Moy Signature Series

Edmund C. Moy
38th Director of the U.S. Mint
A Brief History of Gold and Gold Coinage

Since pre-historic times, gold has been highly prized for its beauty, utility and durability. It may have been the very first metal used by human civilization. Gold's first use was likely in and around Egypt, and it is even referenced several times in Old Testament Biblical texts. By 14th Century B.C., gold was so popular that King Tushratta of Mitanni, near modern-day Syria, remarked that gold was as “common as dust.”

It was first exploited during the age of King Midas and by about 643 B.C., the world's first gold coins began appearing. Centuries later, European exploitation of gold was initially triggered by reports of an abundance of gold ornaments routinely displayed by native people throughout Peru, Colombia and Central America.

For centuries, gold has been widely considered one of the most precious metals. For this reason, it has become the de facto standard for many of the world’s most well-known and stable currencies. Geologically speaking, gold was relatively easy to obtain in ancient times. In medieval times, alchemists attempted to turn alternate substances, like lead, into gold by using a “philosopher’s stone.” While these attempts failed, their activities laid the groundwork for the sciences of chemistry. Nineteenth century history is full of accounts of various gold rushes, most notably in California, Colorado, Alaska and Australia.

Limited Supply

It is estimated that 75% of all gold ever produced throughout history has been mined since 1910. One anecdotal estimate suggests that all the gold ever produced would form a single cube measuring approximately 66 feet on all sides.

The World Gold Council estimates the total world gold supply at 3,859 tons. Because of its durability and historically high value, virtually all of the gold ever produced throughout history is still in circulation. In fact, it is estimated that about 15% of the world’s annual gold consumption is in recycled gold.

Silver and gold coins were first used during the 6th Century B.C. reign of King Croesus in Lydia. The practice quickly spread to the Greek Empire. When Alexander the Great consolidated the Greek Empire 200 years later, he seized over 700,000 troy ounces in gold coinage from the Persian Empire. Gold coinage was in full swing during the Roman Empire, with the Romans minting gold coins on a historic scale. After the fall of the Roman Empire, it took 1,000 years for gold coinage to make a comeback.

By 1200, Venice began to emerge as an economic trading power and was a conduit for gold coinage as a means of trade settlement. By 1284, Venice had established its own gold mint and began producing the ducat, which was the premier gold coinage throughout the known world for the next five centuries. During that time, new gold discoveries led to all the major European powers minting their own gold coinage.

The diversity of coinage continued as new supplies of gold were discovered in Africa and the Americas. However, silver dominated gold until about 1690. With the discovery of new gold in Brazil, gold coins once again came to be more prized than silver coinage. During his tenure as Master of the Mint, Sir Isaac Newton set the official gold standard in 1717, which lasted until the outbreak of World War I. The final triumph of gold over silver occurred during the gold rushes in America and Australia, during which virtually all gold that was mined was turned into gold coinage.

continued on next page
By 1900, the United States had switched from a bimetallic silver and gold standard to a single gold standard. With the outbreak of WWI, nations began to greatly limit their gold and coin production. Even private ownership was restricted. Until recent years, gold coin production remained restricted and gold coins are rarely ever used as tender. Gold coins do, however, remain popular with investors and collectors.

Gold & President Reagan

President Franklin Roosevelt signed Executive Order 6102 in 1933, making private ownership of gold by U.S. citizens illegal. More than 40 years later, President Ford repealed Roosevelt's order, restoring Americans' right to own gold, though the availability of coins was limited until President Reagan authorized the U.S. Mint to produce gold coins again.

The Gold American Eagle family consists of four sizes and denominations: $5, $10, $25, and $50 coins. The legal tender denominations are largely symbolic because the value of the gold content well exceeds its face value. Each $50 Gold Eagle contains one full Troy ounce of gold, while the smaller denominations consist of 1/10, 1/4, and 1/2 Troy ounces respectively.

The Gold Eagle's obverse (front) features an updated rendition of Augustus Saint-Gaudens' classic walking Lady Liberty. The reverse side features a family of eagles with the male eagle grasping an olive branch and flying above a female nesting with her hatchlings. With the exception of denomination and weight, each Gold Eagle is identical in design.

The Gold American Eagle Proofs

The U.S. Mint also produces a Proof version of the Gold Eagles that are identical to the business strike coins. The only design detail unique to the Proof versions is the "W" mint mark beneath the date, which means the coin was produced at West Point, New York. Like the business strikes, the Proofs are also available in four denominations.

In creating brilliant Proof coins, the U.S. Mint undertakes a specialized minting process, which begins by manually feeding burnished coin blanks into presses fitted with special dies, which strike the coins to create the features. To create the effect of detailed images floating above a mirror-like field, each coin is struck multiple times. After minting, each coin undergoes intense scrutiny for production flaws. After passing inspection, each Proof coin is sealed and documented with an individual Document of Authenticity by the U.S. government.

The Importance of Certification

For discerning collectors, condition is of paramount importance. It could be said that the essence of vintage value for virtually any collectible is “history, supply and condition.” In certifying a coin, all aspects of a coin’s characteristics are carefully considered and scrupulously examined, including authenticity, condition and pedigree if applicable. After a coin has completed the inspection and certification stage, it is then sonically sealed in an individual tamper-evident holder and documented with its own serial number to ensure its authenticity.
The U.S. Gold Bureau has partnered with the former director of the United States Mint, Edmund C. Moy, to offer hand-signed certification labels on proof versions of America’s #1 investment coin, the Gold American Eagle. Gold American Eagle coins certified in perfect “Proof 70” condition are highly sought after and have shown a track record of superior investment performance. Coins that are part of the Ed Moy Signature Series are even more rare, with population figures much smaller than the unsigned versions of the coin, which adds to their investment potential even more.

In addition to being the 38th director of the U.S. Mint, Ed Moy is a well-known author, economist, and public speaker. He served as Special Assistant to President George W. Bush for more than five years and assisted with the transition to the new U.S. Department of Homeland Security after the September 11 attacks in 2001.

During Moy’s first year as director, the U.S. Mint sold more than $1 billion in numismatic coins and struck over 16 billion coins in total. During his tenure, the financial crisis and recession spurred an unprecedented demand for gold and silver. The State Quarter Program, Presidential $1 Coin, and the National Parks Quarters were all milestones of Moy’s term with the U.S. Mint.
Ed Moy Signature Series Gold American Eagle Proof 70 Coins

Coins with the Ed Moy signature labels have made headlines due to their extreme popularity and premiums investors are willing to pay at auction. The Ed Moy Signature Series of Gold American Eagle Proof 70 coins have been very well-received by the market and can be an excellent way to diversify your precious metals investment portfolio.

Ed Moy Signature Series Gold American Eagle Proof 70 coins are available individually, as 4-coin sets, and even as a full Date Run featuring one of each Gold American Eagle proof minted since 1986. Demand for these hand-signed coins is strong and is expected to grow as investors and collectors realize the tremendous investment potential of the series. Please contact us for more information about this incredible opportunity available exclusively through the U.S. Gold Bureau.

JANUARY 18
President George W. Bush announces an economic stimulus package, proposing $800 per individual and $1600 per couple in tax refunds.

JUNE 27
After three decades as the Chairman of Microsoft Corporation, Bill Gates steps down from daily duties to concentrate on the Bill & Melinda Gates Foundation.

APRIL 15-20
Pope Benedict XVI visits the United States. Among his destinations are the White House, The Catholic University of America, the United Nations General Assembly and the site of the fallen World Trade Center.

NOVEMBER 4
Barack Obama is elected the 44th President of the United States, becoming the first African-American President-elect.
The Ultra High Relief 2009

Many collectors and investors believe that the 24-karat 2009 Ultra High Relief Double Eagle gold coin is the most beautiful coin the U.S. Mint has ever produced. That’s why many still call it “The Perfect Gold Coin.”
JANUARY 15
US Airways Flight 1549 loses power in both engines shortly after takeoff from LaGuardia, forcing the pilot to ditch the aircraft in the Hudson River. All 155 passengers and crew are rescued with no injuries, and the pilot is hailed a hero.

FEBRUARY 25
James Nicholson, the manager of an unregistered hedge fund, Westgate Capital Management, is arrested and charged in federal court with defrauding hundreds of investors in a Ponzi type scheme.

JUNE 12
Analog television broadcasts end in the United States, as the Federal Communications Commission requires all full power stations to send their signals digitally.

SEPTEMBER 2
The Justice Department announces the largest health care fraud settlement in history, $2.3 billion, involving Pfizer.

2009 ULTRA HIGH RELIEF DOUBLE EAGLE

The United States Mint announced the issue of the 2009 Ultra High Relief Double Eagle Gold Coin on March 13, 2008. This coin promises to fulfill Augustus Saint-Gaudens' vision of an ultra high relief coin that could not be realized in 1907 with his legendary Double Eagle liberty design. Note: The Gold American Eagle proof coin was not minted in 2009 to allow the Mint to focus on this special issue.

A NOTE ABOUT MINTAGE & POPULATION FIGURES

For purposes of future evaluation of the collection, a few things should be mentioned. First, all raw and certified mintage information detailed herein was assembled and confirmed from various reliable industry sources, including the U.S. Mint and the Numismatic Guaranty Corporation (NGC), among others. The “raw” original mintage figures used from 1986-2015 were quoted from the Gold Proof mintages published on the U.S. Mint website for the individual Proof coins minted. The mintage totals only account for the individual denomination coins minted and do not include any mintages for Proof coins that were minted as part of either the four coin Proof Sets, or any special American Eagle anniversary sets.

As for the “certified” population figures included in the book, these numbers are based on the number of Gold Eagle Proof coins certified by NGC in Proof 70 and are accurate as of August 2020. The population of the Ed Moy Signature Series coins is a subset of these populations thus they are significantly lower. While the “raw” mintage figures for the individual denomination 2016 and 2017 Gold Eagle Proofs were not known at time of publishing, the certified proof total through August 2020 was known and is included herein.

All “Rarity Ranking” notations included above all coin pictures are the “rankings” within the specific denomination for the NGC certified Proof 70 populations only. There are other coin certification companies in operation. Therefore, the total population of all certified Proof 70 Gold Eagles is likely larger than just the NGC figures used herein. While we reasonably believe all raw and NGC certified mintage figures are accurate at the time the American Gold Eagle Proof collection was assembled, these numbers are subject to change in the future as more Proof coins are submitted for certification and ultimately certified by NGC.
